

HIGH QUALITY PRODUCTS FOR THE SERIOUS ENTHUSIAST

High Quality RGB Scart Lead (Gold Plated Edition) For the Sinclair QL Computer

The Sinclair QL RGB Scart lead, is a high quality video lead, that allows you to connect your Sinclair QL Computer, to a TV, via the RGB Scart socket, to display a superb full colour RGB picture. This type of lead gives the best picture possible, with this Computer.

This lead is professionally made using high quality materials and workmanship. Made from high quality fully screened video cable, with a high quality gold plated Scart plug and nickel plated 8 pin DIN plug.

Instructions

1. Switch **OFF** the Sinclair QL Computer and TV.
2. Insert the video into the RGB socket, on the back of the QL.
3. Insert the Scart plug into the Scart socket on the back of the TV.
4. Switch **ON** the TV, and select the A/V channel you have connected the Scart lead into.
5. Switch **ON** the QL Computer. You should now have a superb colour picture.

Scart Lead is 2 Metres long

High quality, fully screened thick wall, video cable, for the best quality picture, and no interference. Cable is also soft and flexible.

Retro Computer Shack

Additional components (resistors) are fitted inside the Scart plug, to ensure, the correct signal levels, and produce the best quality picture.

High quality Nickel plated 8 pin DIN plug.

High quality Gold plated Scart Plug.

COMPATIBLE WITH THE SUPER GOLD CARD

Please Note:

I would always recommend using an old stye CRT type TV, with all retro Computers and games consoles, as they will always display the best quality picture possible, some makes and models of LCD & Plasma TV's, may not work as well, or at all.
